

### 8.3 Extra Label sides Triangle Geo handout for notes

The **hypotenuse** is the side that is opposite the right angle, it is the side that is not one of the rays that makes the right angle. The hypotenuse is the longest side of the triangle. The side opposite an angle is the side that is not one of the rays that makes the angle. The side adjacent to an angle is a part of the angle, but is not the hypotenuse
