

HW4W 2 sin, cos, and tan

Name: _____

Find the missing side of each right triangle to the nearest tenth. Write each trig ratio as a fraction, no need to simplify fractional answers.

1.

a. $\sin A = \underline{\hspace{2cm}}$

b. $\cos A = \underline{\hspace{2cm}}$

c. $\sin B = \underline{\hspace{2cm}}$

d. $\cos B = \underline{\hspace{2cm}}$

e. $\tan A = \underline{\hspace{2cm}}$

f. $\tan B = \underline{\hspace{2cm}}$

3.

m. $\sin A = \underline{\hspace{2cm}}$

n. $\cos B = \underline{\hspace{2cm}}$

o. $\sin B = \underline{\hspace{2cm}}$

p. $\cos A = \underline{\hspace{2cm}}$

q. $\tan B = \underline{\hspace{2cm}}$

r. $\tan A = \underline{\hspace{2cm}}$

2.

g. $\sin A = \underline{\hspace{2cm}}$

h. $\cos A = \underline{\hspace{2cm}}$

i. $\sin B = \underline{\hspace{2cm}}$

j. $\cos B = \underline{\hspace{2cm}}$

k. $\tan A = \underline{\hspace{2cm}}$

l. $\tan B = \underline{\hspace{2cm}}$

4.

s. $\sin A = \underline{\hspace{2cm}}$

t. $\cos B = \underline{\hspace{2cm}}$

u. $\sin B = \underline{\hspace{2cm}}$

v. $\cos A = \underline{\hspace{2cm}}$

w. $\tan A = \underline{\hspace{2cm}}$

x. $\tan B = \underline{\hspace{2cm}}$

HW4W 2 sin, cos, and tan

Name: _____

Find the missing side of each right triangle to the nearest tenth. Write each trig ratio as a fraction, no need to simplify fractional answers.

5.

y. $\sin A =$ _____

z. $\sin B =$ _____

aa. $\cos A =$ _____

bb. $\cos B =$ _____

cc. $\tan A =$ _____

dd. $\tan B =$ _____

6.

ee. $\sin B =$ _____

ff. $\cos A =$ _____

gg. $\sin A =$ _____

hh. $\cos B =$ _____

ii. $\tan B =$ _____

jj. $\tan A =$ _____

HW4W 3 Find the Missing Side

Name: _____

Follow the directions as given below for each problem. Round answers to 2 decimal places.

1.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve. Show work

2.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve. Show work.

3.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve. Show work.

4.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve. Show work.

HW4W 3 Find the Missing Side

Name: _____

Follow the directions as given below for each problem. Round answers to 2 decimal places.

5.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve. Show work.

6.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve. Show work.

7.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve.

8.

- Label all sides of the triangle using the marked angle.
- Using the side given and the side we are looking for we will use _____.
- Set up the trig ratio and solve.

HW4W 4 Find the Missing Angle (or side)

Name: _____

Follow the directions as given below for each problem. Round answers to 1 decimal place.

1.

$$x = \underline{\hspace{2cm}}$$

- d.** Label all sides of the triangle using the marked angle.
e. Using the sides given we will use _____.
f. Set up the trig ratio and solve. Show work.

2.

$$x = \underline{\hspace{2cm}}$$

- j.** Label all sides of the triangle using the marked angle.
k. Using the sides given we will use _____.
l. Set up the trig ratio and solve. Show work.

3.

$$x = \underline{\hspace{2cm}}$$

- g.** Label all sides of the triangle using the marked angle.
h. Using the sides given we will use _____.
i. Set up the trig ratio and solve. Show work.

4.

$$x = \underline{\hspace{2cm}}$$

- m.** Label all sides of the triangle using the marked angle.
n. Using the sides given we will use _____.
o. Set up the trig ratio and solve. Show work.

HW4W 4 Find the Missing Angle (or side)

Name: _____

Follow the directions as given below for each problem. Round answers to 1 decimal place.

5.

p. Label all sides of the triangle using the marked angle.

q. Using the sides given we will use _____.

r. Set up the trig ratio and solve. Show work.

6.

v. Label all sides of the triangle using the marked angle.

w. Using the sides given we will use _____.

x. Set up the trig ratio and solve. Show work.

7.

s. Label all sides of the triangle using the marked angle.

t. Using the sides given we will use _____.

u. Set up the trig ratio and solve. Show work.

8.

y. Label all sides of the triangle using the marked angle.

z. Using the side given and the side we are looking for we will use _____.

aa. Set up the trig ratio and solve. Show work.
